

# SUPPLEMENTAL CASE REPORT

State Form 44338 9-90

Page 1	Of 1	Result	Case Number 001
-----------	---------	--------	--------------------

Offense/Incident: Bank Robbery	I.c. Code/I.A.C.
-----------------------------------	------------------

Victim Name/Business: Gotham First National Bank	Victim's Address 2001 Gotham Ave.
---	--------------------------------------

SUMMARY: I am writing this report as the cyber forensic analyst. I was called to the scene by LT. Jim Gordon, who found the running laptop. On site, I used FTK imager to make an image of the ram and the hard drive. After this, the laptop was collected by LT. Gordon on 11/7/2020 who then signed it back out to me for analysis on 11/8/2020. I used FTK imager and the image I created to investigate the files from the laptop. I was able to locate a word document as well as several pictures. I used exiftool to analyze these pictures for dates and times of when they were created. I was also able to look at the metadata of the word document to find the date of when it was created. I copied the document to a secure storage location as well as all of the pictures that were located. I was able to open the document and find that it contained plans for the bank robbery. I also used registry viewer to find web searches performed on the laptop. These included searches for bank security cameras and floor plans of the Gotham First National Bank. I included all of these artifacts in my forensic log excel sheet. It includes all found artifacts, the date and time it was created, the date it was recovered, and a brief description of each artifact. I then returned the laptop to Lt. Gordon on 3/1/2021 as evidenced on the chain of custody form.

Dist. Cmdr. Name, PE, Date Lieutenant Jim Gordon. 3/1/2021	Reg. Cmdr.	Case Status Open	Officer's Name, PE, Date Ryan Hinson, Forensic analyst, 3/1/2021
